**28 / 100** Speed

## Should Fix:

### Optimize images

**Properly formatting and compressing images can save many bytes of data.**

[Optimize the following images](#) to reduce their size by 2.3MiB (99% reduction).

Compressing and resizing [http://linguist.us/...\\_non-optimized/views/images/pizzeria.jpg](http://linguist.us/..._non-optimized/views/images/pizzeria.jpg) could save 2.3MiB (99% reduction).

Losslessly compressing [http://linguist.us/p4\\_1\\_non-optimized/img/profilepic.jpg](http://linguist.us/p4_1_non-optimized/img/profilepic.jpg) could save 9.7KiB (76% reduction).

 [Hide details](#)

### Eliminate render-blocking JavaScript and CSS in above-the-fold content

**Your page has 1 blocking script resources and 3 blocking CSS resources. This causes a delay in rendering your page.**

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript:](#)

<http://www.google-analytics.com/analytics.js>

[Optimize CSS Delivery](#) of the following:

http://fonts.googleapis.com/css?family=Open+Sans:400,700

http://linguist.us/p4\_1\_non-optimized/css/style.css

http://linguist.us/p4\_1\_non-optimized/css/print.css

 [Hide details](#)

## Consider Fixing:

### Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

Leverage browser caching for the following cacheable resources:

http://linguist.us/p4\_1\_non-optimized/css/print.css (expiration not specified)

http://linguist.us/p4\_1\_non-optimized/css/style.css (expiration not specified)

http://linguist.us/p4\_1\_non-optimized/img/profilepic.jpg (expiration not specified)

http://linguist.us/p4\_1\_non-optimized/js/perfmatters.js (expiration not specified)

http://linguist.us/...\_non-optimized/views/images/pizzeria.jpg (expiration not specified)

http://www.google-analytics.com/analytics.js (2 hours)

## 7 Passed Rules

 [Show details](#)

Download optimized [image](#), [JavaScript](#), and [CSS resources](#) for this page.

## 100 / 100 User Experience

## Congratulations! No issues found.

### Avoid plugins

Your page does not appear to use plugins, which would prevent content from being usable on many

platforms. Learn more about the importance of [avoiding plugins](#).

### Configure the viewport

Your page specifies a viewport matching the device's size, which allows it to render properly on all devices. Learn more about [configuring viewports](#).

### Size content to viewport

The contents of your page fit within the viewport. Learn more about [sizing content to the viewport](#).

### Size tap targets appropriately

All of your page's links/buttons are large enough for a user to easily tap on a touchscreen. Learn more about [sizing tap targets appropriately](#).

### Use legible font sizes

The text on your page is legible. Learn more about [using legible font sizes](#).
